The screenshot shows the Windows Disk Management console. At the top, a table lists the system's volumes. Below this, the physical disks are shown with their partitions and file systems. Disk 0 is a basic disk with three partitions: a 450 MB Recovery Partition, a 99 MB EFI System Partition, and a 59.45 GB NTFS primary partition (C:). Disk 1 is a removable disk with four partitions: a 286 MB Primary Partition, a 244 MB Primary Partition, a 6.88 GB Primary Partition, and a 44 MB Unallocated space. A red box highlights the Disk 1 section. A legend at the bottom indicates that black represents unallocated space and blue represents a primary partition.
